### DETAILED ACTION

The finality of the last office action dated 10/08/2003 has been withdrawn in light of the amendment filed 3/1/04.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Goto US Patent 5,786,737 (of record).

Goto discloses a main line and a plurality of stubs (impedance transformation network). Between the stubs, switching FET is disposed, and the length of the stubs connected to the main line, can be changed by on-off operation of the switching FET. Applying a voltage to the gate controls the FET. The stubs are a quarter of a wavelength long and will <sup>be</sup> resonant at the operating frequencies. At resonance the reactances associated with the capacitance and inductance will cancel each other. (See teaching reference "Resonance" by Howard Stone) (See figures 4b)

***Allowable Subject Matter***

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or fairly teach the impedance transformation network being designed so as to make the off-state effective high capacitance of said FET in high frequency become low impedance, while the on-state low impedance of said FET in high frequency becomes high impedance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly E Glenn whose telephone number is (571)-272-1761. The examiner can normally be reached on Monday-Friday 7:30 to 4:00.
